

EQUALIZATION STEERING COMMITTEE

To: All Shippers Participating in the Equalization Process

From: Equalization Steering Committee

Nora Paris and Bryan Thiedemann, Co-Chairs

Date: January 31, 2023

Subject: **Equalization Procedures Guide - Update**

The Equalization Steering Committee identified the need to clarify some potential ambiguities in the current Equalization Procedure Guide. As a result, the Committee initiated the Equalization Procedures Guide review process in November 2019. Since then, the EQ Steering Committee members and observers have been reviewing the document during its regular monthly meetings.

In October 2022, the Equalization Steering Committee approved the changes to the Equalization Procedure Guide and on October 12, 2022, the Committee requested that Shippers vote on proposed changes to the Equalization Procedure Guide. The initial deadline to submit the ballots was November 10, 2022. However, the deadline was extended to December 8, 2022, to increase industry engagement.

The Equalization Procedures Guide changes were approved by Shippers, and they will take effect for the production month of **February 2023**. The approved document can be downloaded from the www.industryeq.ca website.
